

Leading edge battery technology
for superior performance

Lightweight with fast lifting

Up to 80 lifts on one charge

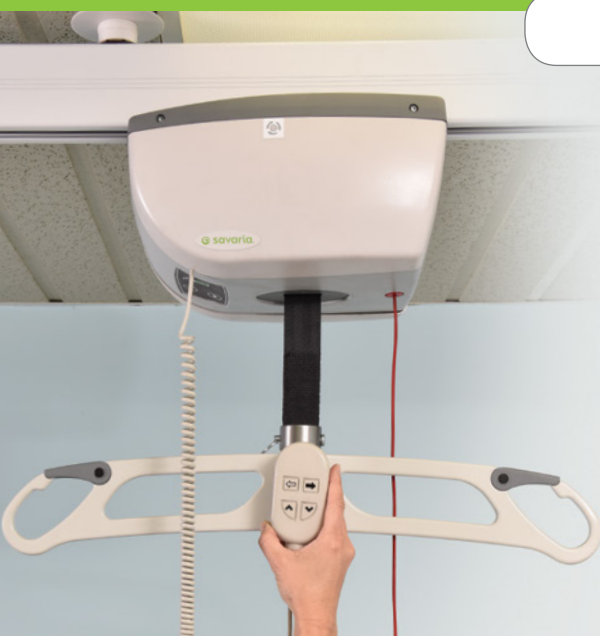

Lower cost of ownership

Savaria® fixed ceiling lift

SIMPLICITY IN DESIGN

Designed by highly regarded industry veterans, the Savaria ceiling lift line brings thoughtful design to virtually every component resulting in simplicity of use and superior performance. At the heart of the product is a lithium-ion battery, similar to those powering today's leading electric vehicles. Say goodbye to heavy, inefficient lead-acid batteries that are forever needing to be replaced. The Savaria ceiling lift can perform up to 80 lifts on a single charge and requires a daily charge of only 15 to 30 minutes. This unique technology offers many benefits including a significantly longer product life, reducing the cost of the ownership for the lift.

Purpose-driven design means that you will find the unit easy and intuitive to use with no extraneous functions on the unit or the hand control. The unique Sure-Clip system opens out rather than in, reducing errors in hooking the sling onto the lift. Choose a manual or motorized trolley to configure using a full complement of straight and curved ceiling track as well as hardware to work with wood, steel or concrete structures.

Savaria® fixed ceiling lift

SIMPLICITY IN DESIGN

- Lithium-ion battery provides superior performance for number of lifts on one charge as well as ultra-fast charging time
- Longer product life expectancy of 10 years as a result of better battery technology (with only 1 battery replacement)
- Green battery technology – long lasting and no disposal of lead-acid materials
- Unique Sure-Clip system opens out, rather than in, to reduce errors in hooking sling to unit
- Emergency stop cord engages stop function only – ensuring desired result. Dual safety system: emergency lowering system and safety braking system
- Handy magnetic hand control pendant to easily attach to spreader bar
- Spreader bar features grip handles for patients who wish to hold bar during travel
- Three capacities available for up to 600 lb safe working load (SWL)
- Universal mesh sling with adjustable head support, hygienic sling and walking sling available in 3 sizes up to 600 lb capacity
- Motorized or manual trolley available
- Full range of ceiling track configurations including straight and curved track for wood, steel or concrete structures; wall mounts, XY system, semi permanent gantry and all hardware needed for installations

SPECIFICATIONS

Applications	Patient lifting, room-to-room transfer, long-term use, residential or institutional use
Product weight	Manual model: 17 lb (7.5 kg), motorized model: 19 lb (8.5 kg)
Safe working load	600 lb (272 kg), 440 lb (200 kg), or 286 lb (130 kg)
Lifting speed	2 in/sec (5 cm/sec) at 286 lb (130 kg) 1.8 in/sec (4.5 cm/sec) at 440 lb (200 kg) 1.6 in/sec (4 cm/sec) at 600 lb (272 kg)
Battery type	Lithium-ion, 25.2V 2500 mAh
Lifts per charge	Approx. 80 cycles of 24 in (61 cm) at 200 lb (91 kg) Approx. 70 cycles of 24 in (61 cm) at 286 lb (130 kg) Approx. 45 cycles of 24 in (61 cm) at 440 lb (200 kg) Approx. 30 cycles of 24 in (61 cm) at 600 lb (272 kg)
Battery charging	Full capacity in approximately 2 hours
Warranty	1 year limited warranty
Compliance	Meets all international certification and compliance standards for medical devices. Class 1 medical device.
